

Investment Approach:

The Newscapē Managed Portfolio Service offers a range of risk graded multi-asset portfolios. There are 5 total return portfolios ranging from Defensive through to Growth, plus one Income portfolio. Our base case Strategic Asset Allocations, which are constructed with reference to 20 years of underlying asset class data, aim to optimise expected return at a given level of risk over the longer term. The Strategic Asset Allocations are then overlaid with a Tactical Asset Allocation providing our investment committee with the potential to navigate shorter term market opportunities and pitfalls. The 'Active Strategy' portfolios predominantly hold actively managed investment funds. However, passively managed funds may also be used where deemed appropriate given the prevailing economic and asset class environment.

Portfolio Objective:

The objective is to deliver a total annual return in the range of 4.5% - 6.0% over the longer term.

Portfolio Risk:

A lower to medium risk portfolio which aims to provide investors with more stable returns than portfolios with a greater focus on growth. (Volatility target 4.0% - 7.0% per annum over the longer term).
