

Investment Approach:

The Newscap Managed Portfolio Service offers a range of risk graded multi-asset portfolios. There are 5 total return portfolios ranging from Defensive through to Growth, plus one Income portfolio. Our base case Strategic Asset Allocations, which are constructed with reference to 20 years of underlying asset class data, aim to optimise expected return at a given level of risk over the longer term. The Strategic Asset Allocations are then overlaid with a Tactical Asset Allocation providing our investment committee with the potential to navigate shorter term market opportunities and pitfalls. The 'Active Strategy' portfolios predominantly hold actively managed investment funds. However, passively managed funds may also be used where deemed appropriate given the prevailing economic and asset class environment.

Portfolio Objective:

The objective is to deliver a total annual return in the range of 7.0% - 10.0% over the longer term.

Portfolio Risk:

A higher risk portfolio which aims to provide capital growth where an investor is prepared to accept a higher level of risk for the potential of greater returns. (Volatility target 10.0% - 16.0% per annum over the longer term).
