

Investment Approach:

The Newscap Managed Portfolio Solution (NMPS) is a range of risk graded multi-asset portfolios, with strategies ranging from Defensive to Growth (& Income), aimed at the medium-longer term investor. A "tactical" asset allocation overlay allows the strategic allocations to be adjusted in order to take advantage of 'shorter term' market opportunities and/or limit exposure to asset classes deemed to have 'shorter term' market risk. The 'Active Strategy' mandate is predominately fulfilled through the use of active investment funds (Open Ended Investment Company and unit trusts) using our top-down investment process. Passive funds may also be used where deemed appropriate given the prevailing economic and asset class environment.

Portfolio Objective:

The objective is to deliver a total annual return in the range of 6.0% - 8.0% over the longer term.

Portfolio Risk:

A medium to high risk portfolio aimed at investors able to accept a higher level of risk, but still want less volatility than they would experience if entirely exposed to global equity markets. (Volatility target 8.0% - 13.0% per annum over the longer term).
